Research Interests

I am an electronics and computer engineer interested in artificial intelligence, applied deep learning, reinforcement learning, and bioinformatics. I am currently working towards applying AI-based methods for Protein and Antibody Design applied to drug discovery. I am also interested in improving exploration and credit assignment in single-agent and multi-agent reinforcement learning. My main research interests are deep learning applications in robotics, data science, natural language processing and bioinformatics. I have previous research experiences in speech synthesis, natural language processing (using recurrent neural networks and transformers), and robotic applications using continuous control.

Positions

Data Science Group, Institute for Basic Science *Daejeon, South Korea, Oct. 2021 - Present*

Senior Researcher.

Mechanical Engineering Research Institute, KAIST *Daejeon, South Korea, Mar. 2021 - Sep. 2021*

Postdoctoral Researcher.

Education

Korea Advanced Institute of Science and Technology (KAIST) *Daejeon, South Korea, Aug. 2017 - Feb. 2021*

P.h.D. in Green Transportation. Advisor: Dongsoo Har.

Thesis topic: Performance Enhancement in Multigoal Reinforcement Learning using Hindsight Experience Replay.

COPPE - Federal University of Rio de Janeiro (UFRJ) *Rio de Janeiro, Brazil, Mar. 2015 - Apr. 2017*

M.S. in Electrical Engineering. Advisor: Fernando Gil Vianna Resende Junior.

Thesis topic: Comparison between rule-based and data-driven Natural Language Processing algorithms for Brazilian Portuguese Speech Synthesis.

Federal University of Rio de Janeiro (UFRJ) *Rio de Janeiro, Brazil, Feb. 2009 - Dec. 2014*

B.S. in Electronics and Computer Engineering.

Korea Advanced Institute of Science and Technology (KAIST) *Daejeon, South Korea, Feb. 2013 - Feb. 2014*

Exchange Student in Electrical Engineering (Science without Borders Program).

Work Experiences

Hyundai Motor Company, Namyang Research and Development Center *Namyang, South Korea, Jul. 2013*

Intern. Advisor: Dong-pil Yoon.

Honors and Awards

Science without Borders Program *Feb. 2013 - Feb. 2014*

Brazilian government 1 year scholarship for undergraduate students with outstanding academic achievements.

Academic Services

Reviewer

IEEE Transactions on Cybernetics

IEEE Sensors

IEEE Transactions on Games

ICML LatinX Workshop *2021*

AAAI ICWSM 2022 *2022*

Invited Presentations

School of AI Convergence - Chonnam National University *Nov. 2021*

Invited to present the work titled "*Identifying the key actions that lead an agent to accomplish a task in model-based deep reinforcement learning.*"

Cho Chun Shik Graduate School of Green Transportation - KAIST *Oct. 2021*

Invited to present the work titled "*Performance enhancement in multigoal model-based deep reinforcement learning*."

Institute for Basic Science (IBS) *Apr. 2021*

Invited to present the work titled "*Identifying the key actions that lead an agent to accomplish a task in model-based deep reinforcement learning*."
